## Drainage Engineer

---

### About Us

Aulick Engineering is a woman-owned small business that provides engineering design and construction management services for transportation and site related projects. Aulick provides quality professional services to airports, DOTs, municipalities, engineering firms, commercial developers, and private residents around the southeast.

Aulick Engineering offers team members the opportunity to grow at their own pace without being boxed into a typical role. Our closely-knit team will work directly with you to provide a challenging, rewarding, and hands-on experience in all aspects of our work. Team members are given the opportunity to work on numerous aspects of projects where they can be involved from concept design to construction. Aulick Engineering prides itself on an inclusive culture, while providing a workplace where hard work is recognized and rewarded with an emphasis on individual development. Our team members are kind, resourceful, respectful, and trustworthy and we are looking for others who share those values.

### Job Description

We are currently looking for a mid-level Drainage Engineer to work in our Atlanta, GA, Durham, NC, or Columbia, SC office. The ideal candidate should possess a desire to work for a fast-paced, growing, “never a dull moment” business and meet the qualifications listed below. This position will be considered an in-office position with expectations that the candidate be in the office 2-4 days per week depending on experience level and project needs.

### Qualifications

- Bachelor of Science in Civil or Environmental Engineering
- Professional Engineer (PE) license required
- 5-10 years of experience in related field
- Proficient in Microsoft Office
- Plan production experience and knowledge of MicroStation is required
- Knowledge of StormCAD, Geopak/InRoads Drainage, OpenRoads, Hy-8, and/or CivilStorm is preferred
- Experience with HEC-RAS is a plus
- Proficient in DOT requirements and procedures, specifically drainage and hydraulic components
- General working knowledge of fundamental engineering principles including roadway drainage design and erosion control plan development

### Responsibilities

- Applicant will work on projects that focus on drainage design, bridge/culvert hydraulics, stormwater design, and erosion control plan development for roadway projects.
- Typical projects will include bridge/culvert hydraulic studies, drainage pipe design calculations, spread calculations, ditch capacity analysis, culvert design and inlet design, technical reports, and plan production
- Develop Erosion, Sedimentation, and Pollution Control Plans specifically for roadway projects
- Visit job sites for inspection and evaluation of drainage systems and other hydraulic components
- Manage a project and project team members independently from concept to completion.

- Perform other responsibilities associated with this position as may be appropriate

## Benefits

- Medical insurance
- Vision and dental insurance
- Healthcare and dependent care flexible spending accounts (HSA and FSA)
- Employer-paid short-term and long-term disability coverage
- Employer-paid life insurance and AD&D insurance
- 401k program with company match
- Paid time off
- Ten (10) paid holidays
- Fitness membership reimbursement
- Hybrid work policy
- Company-provided equipment, including laptop and cell phone

## Equal Opportunity Employer

Aulick Engineering is an Equal Employment Opportunity (EEO) employer and welcomes all qualified applicants. Applicants will receive fair and impartial consideration without regard to race, sex, religion, national origin, age, sexual orientation, disability, veteran status, genetic data, or other legally protected status.
