

Aviation Engineering Services Director

About Us

Aulick Engineering is a woman-owned small business that provides engineering design and construction management services for transportation projects. Aulick provides quality professional services to airports, DOTs, municipalities, engineering firms, and commercial developers around the southeast.

Aulick Engineering offers team members the opportunity to grow at their own pace without being boxed into a typical role. Our closely-knit team will work directly with you to provide a challenging, rewarding, and hands-on experience in all aspects of our work. Team members are given the opportunity to work on numerous aspects of projects where they can be involved from concept design to construction. Aulick Engineering strives to provide a workplace where hard work is recognized and rewarded while still encouraging a healthy work-life balance. Our team members are kind, resourceful, respectful, and trustworthy, and we are looking for others who share those values.

Job Description

We are currently looking for a senior level engineer to lead our Aviation design group. The ideal candidate should possess a desire to work for a fast-paced, growing engineering firm and meet the qualifications listed below.

Qualifications

- Bachelor of Science in Civil Engineering or related field, required
- Professional Engineer license required – GA, SC, and NC or ability to obtain within six months of hiring
- Minimum of fifteen (15) years of progressively responsible experience in aviation engineering including staff supervision
- Experience managing design services including department planning, projections, and financials.
- Expert knowledge of fundamental engineering principles including surveying, geometric design, hydraulics, hydrology, stormwater management, grading, pavement design, construction administration, and utility coordination
- Expert knowledge of Federal Aviation Administration standards and procedures within the Advisory Circulars and the National Environmental Policy Act
- Experience as a prime consultant on an airport on-call contract
- Experience assisting airports with grant applications
- Experience developing Airport Capital Improvement Plans
- The candidate may be in our Atlanta, Columbia, Charleston, Greenville, or Durham offices with Atlanta being the preference. Other remote opportunities may be available.

Responsibilities

- Review and approve scopes, fees, and contracts

- Oversight of discipline management for both aviation design and planning.
- Develop and maintain strategic partnerships with local, state, and federal officials including state aviation agencies and FAA
- Represent Aulick in state and federal funding meetings and aviation industry groups as required
- Attend and be involved with clients and various meetings including project kickoffs, critical issues, or key technical decisions for large projects
- Conduct regular check-ins with key clients
- Responsible for business development with existing clients
- Based on results of client retention and satisfaction from Marketing Team, coordinate with DMs or implement department level changes to improve results
- Other responsibilities as assigned

Benefits

- Medical insurance
- Vision and dental insurance
- Healthcare and dependent care flexible spending accounts (HSA or FSA)
- Employer-paid short-term and long-term disability coverage
- Employer-paid life insurance and AD&D insurance
- 401k program with company match
- Discretionary time off. We value and respect time off!
- Ten (10) paid holidays
- Fitness membership reimbursement
- Flexible hours and remote opportunities
- Company-provided equipment, including laptop and cell phone

Equal Opportunity Employer

Aulick Engineering is an Equal Employment Opportunity (EEO) employer and welcomes all qualified applicants. Applicants will receive fair and impartial consideration without regard to race, sex, religion, national origin, age, sexual orientation, disability, veteran status, genetic data, or other legally protected status.
